

**BKV TaqMan Probe/Primer and Control Set - 100 Reactions**  
Product # TM36510

Component	Product # TM36510 (100 Reactions)
BKV Primer & Probe Mix	1 x 280 µL
BKV Positive Control	1 x 150 µL
Nuclease-Free Water	1 x 1.25 mL

**Applications**

TaqMan Probe/Primer and Control Set for BKV detection using real-time PCR based on the use of TaqMan® technology.

**Storage Conditions and Product Stability**

Store all the components at -20°C upon arrival. All kit components can be stored for 2 years after the date of production without showing any reduction in performance.

**Precautions and Disclaimers**

This product is designed for research purposes only. It is not intended for human or diagnostic use.

**Customer-Supplied Reagents and Equipment**

- Real-Time PCR Instrument with multiple filter channel (FAM channel minimum)
- 2x PCR Master Mix
- **Optional** – Norgen's TaqMan 2X PCR Master Mix can be used for PCR validation purposes (Please see related products table below)

**Procedures**

**Recommended Reaction Conditions:**

- BKV Primer Mix (2 µL per 20 µL PCR reaction)
- BKV Positive Control (2-8 µL per 20 µL PCR reaction)

**Description**

The positive control is a cloned partial BKV DNA.

**Recommended TaqMan PCR Assay**

PCR Cycle	Step	Temperature	Duration
<i>Cycle 1</i>	Step 1	95°C	3 min
	Step 2	60°C	30 sec
<i>Cycle 2 (40x)</i>	Step 1	95°C	15 sec
	Step 2	60°C	30 sec

**Interpretation of Assay Results**

* FAM (Target detection)	** HEX/VIC (PCR validation-optional)	Result
+	+	<b>Positive</b>
-	+	<b>Negative</b>
-	-	<b>PCR inhibited</b>

\* FAM channel for target detection with a regular 2x PCR Master Mix

\*\* **Optional** - HEX or VIC channel is only required when Norgen's TaqMan 2X PCR Master Mix (Cat.#28340) is used for PCR validation purpose.
