

Cladosporium cladosporioides TaqMan Probe/Primer and Control Set - 100 Reactions

Product # TM33010

Component	Product # TM33010 (100 Reactions)
Cladosporium cladosporioides Primer & Probe Mix	1 x 280 µL
Cladosporium cladosporioides Positive Control	1 x 150 µL
Nuclease-Free Water	1 x 1.25 mL

Applications

TaqMan Probe/Primer and Control Set for *Cladosporium cladosporioides* detection using real-time PCR based on the use of TaqMan® technology.

Storage Conditions and Product Stability

Store all the components at -20°C upon arrival. All kit components can be stored for 2 years after the date of production without showing any reduction in performance.

Precautions and Disclaimers

This product is designed for research purposes only. It is not intended for human or diagnostic use.

Customer-Supplied Reagents and Equipment

- Real-Time PCR Instrument with multiple filter channel (FAM and HEX channel)
- 2x PCR Master Mix
- **Optional** – Norgen's TaqMan 2X PCR Master Mix can be used for PCR validation purposes (Please see related products table below)

Procedures

Recommended Reaction Conditions:

- Cladosporium cladosporioides Primer and Probe Mix (2 µL per 20 µL PCR reaction)
- Cladosporium cladosporioides Positive Control (2-8 µL per 20 µL PCR reaction)

Description

The positive control is a synthetic oligonucleotide containing partial *Cladosporium cladosporioides*.

Recommended TaqMan one step PCR Assay

One Step PCR Cycle	Step	Temperature	Duration
Cycle 1	Step 1	95°C	3 min
	Step 2	60°C	30 sec
Cycle 2 (40x)	Step 1	95°C	15 sec
	Step 2	60°C	30 sec

Interpretation of Assay Results

* FAM (Target detection)	** HEX/VIC (PCR validation-optional)	Result
+	+	Positive
-	+	Negative
-	-	PCR inhibited

* FAM channel for target detection with a regular 2x PCR Master Mix

** **Optional** - HEX or VIC channel is only required when Norgen's TaqMan 2X PCR Master Mix (Cat.#28340) is used for PCR validation purpose.
