

Norgen Biotek is a Reliable Partner for Clinical Testing, Contract R&D, and OEM Manufacturing

Norgen Biotek is an Accredited State-of-the-Art Facility

1. Quality OEM Manufacturing of Life Science Products

- **Purification Kits:** Best-in-class, for RNA, DNA, Protein for all types of samples and markets
- **Collection & Preservation:** Saliva, Urine, Stool, Blood, Plasma, Sputum DNA & RNA
- **Flexible Production Model:** Full branded product manufacturing or bulk for bundling

2. Molecular Diagnostics from R&D to Manufacturing

- **Accredited:** Molecular testing for clinical trials & regulatory submission support
- **Experienced:** Molecular testing R&D, design & execution: from sample to submission
- **Compliant:** Products are designed & developed for submission for CE & FDA clearance

3. Cleanroom High Throughput Filling

- **ISO-certified and Validated:** Class 7 certified cleanroom environment for kit manufacturing
- **Validated:** High throughput liquid filling, labeling & capping for various size vials and bottles

4. Contract R&D

- **Added Value:** Extension to clients laboratories to carry out basic R&D
- **Competency:** Develop testing methods for verification and validation of experimental data
- **Grant Support:** Full R&D services for client grants and support for grant submission
- **Concept-to-Product:** Full service to product realization and commercialization

5. Sample Preparation & Analysis Services

- **RNA & DNA Purification:** For all types of samples (tissues, cells, FFPE, plasma, blood, plants, and more)
- **qRT-PCR & PCR:** For sample analysis, microRNA analysis, custom biomarker discovery & signal pathways
- **Genotyping:** SNP analysis, STR analysis, cell genotyping

Fast, Reliable, Competent, Experienced, Affordable

We would be delighted to discuss how you can leverage our experience to develop and/or acquire products, and accelerate your R&D to finished products and regulatory submission.
